

Session 1. Optimization of Intraoperative Ventilation in Children

Optimal Target of O₂ and CO₂

Learning Objectives:

1. The learner can talk about the use of oxygen and carbon dioxide in the field of anesthesiology.
2. The learner can explain the regulation of oxygen and carbon dioxide in pediatric patients.
3. The learner can explain oxygen toxicity.
4. The learner can explain the control of oxygen and carbon dioxide in the special circumstances of pediatric patients.
5. The learner can discuss about ideal oxygen and carbon dioxide concentrations.
